BOOK SYNOPSIS

History has tended to measure wars winners and losers in terms of its major engagements, battles in which the result was so clear-cut that they could be considered "decisive." Cannae, Konigsberg, Austerlitz, Midway, Agincourt-all resonate in the literature of war and in our imaginations as tide-turning. But these legendary battles may or may not have determined the final outcome of the wars in which they were fought. Nor has the "genius" of the so-called Great Captains - from Alexander the Great to Frederick the Great and Napoleon - play a major role. Wars are decided in other ways. Cathal J. Nolans *The Allure of Battle* systematically and engrossingly examines the great battles, tracing what he calls "short-war thinking," the hope that victory might be swift and wars brief. As he proves persuasively, however, such has almost never been the case. Even the major engagements have mainly contributed to victory or defeat by accelerating the erosion of the other sides defences. Massive conflicts, the so-called "peoples wars," beginning with Napoleon and continuing until 1945, have consisted of and been determined by prolonged stalemate and attrition, industrial wars in which the determining factor has been not military but matériel. Nolans masterful book places battles squarely and mercilessly within the context of the wider conflict in which they took place. In the process it help corrects a distorted view of battles role in war, replacing popular images of the "battles of annihilation" with somber appreciation of the commitments and human sacrifices made throughout centuries of war particularly among the Great Powers. Accessible, provocative, exhaustive, and illuminating, *The Allure of Battle* will spark fresh debate about the history and conduct of warfare.
